

Data base:

The screenshot shows the phpMyAdmin interface for a database named 'yum'. The left sidebar shows the database structure with tables: information_schema, mysql, performance_schema, phpmyadmin, test, yum, and yum_new. The main area displays the structure of the 'yum' database, listing tables: admin, category, reservation, restaurant, and review. Each table entry includes its name, character set (utf8_general_ci), collation (InnoDB), and size. The 'admin' table is highlighted.

Admin (ID,username,password,email)

The screenshot shows the data in the 'admin' table. The table has columns: email, password, username, and id. There are 6 rows of data, each with a unique email, password, username, and id. The 'id' column is the primary key.

email	password	username	id
admin@gmail.com	21232f297a57a5a743894a0e4a801fc3	admin	1
reema@hotmail.com	04F459E03003549C661AFC0EF5BC37AC	Reema	2
Renad@gmail.com	748978A00530EA4A7D6381A09DBC3FAA	Renad	3
Ghaliah@hotmail.com	E06F42369D95097325E0AA93365A5C32	Ghaliah	4
Shahad@gmail.com	1FA5F0519DAAE3B49B58D85F4B2DEB1B	Shahad	5
Wed@gmail.com	42647AB608C1DBAFC2B378C45DC7BD8A	Ms.wed	6

Category(ID,name,description)

The screenshot shows the data in the 'category' table. The table has columns: description, name, and id. There are 2 rows of data: 'Casual Restaurants' and 'Fine Dining Restaurants'. The 'id' column is the primary key.

description	name	id
Casual Restaurants	Casual Restaurants	1
Fine Dining Restaurants	Fine Dining Restaurants	2

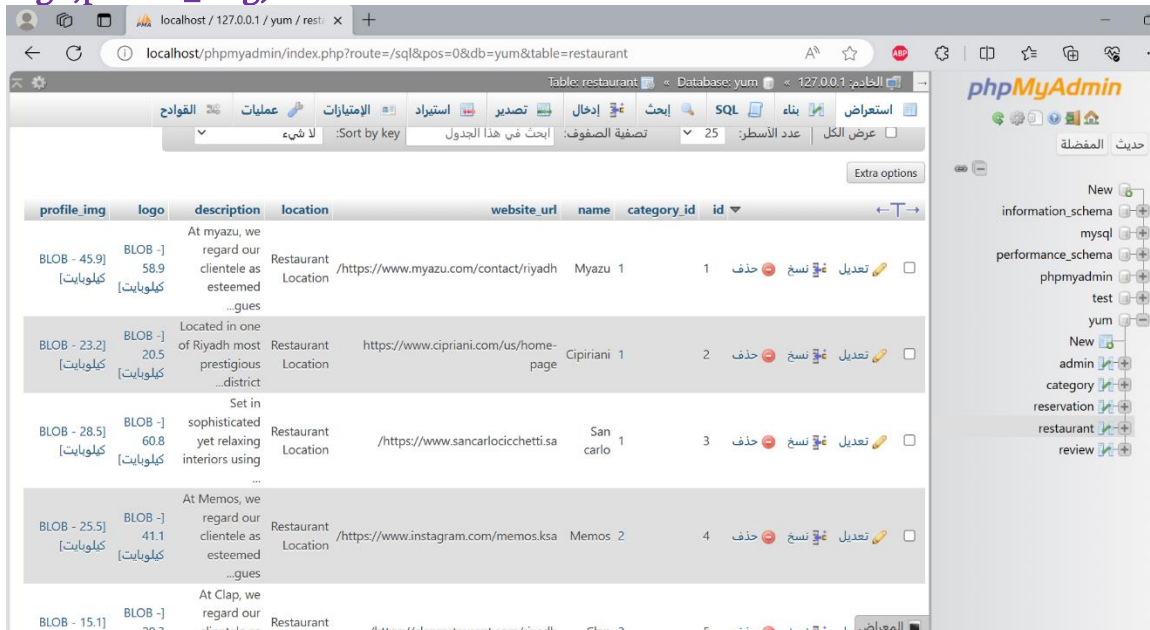

Reservation(ID,restaurant_id,fir_name,last_name,phone_number, gusts_no,table_no,date,time)

The screenshot shows the data in the 'reservation' table. The table has columns: time, date, table_no, gusts_no, phone_number, last_name, first_name, restaurant_id, and id. There is 1 row of data: a reservation for 'Reema' at 'Casual Restaurants' on '2023-11-22' at '00:12:00'. The 'id' column is the primary key.

time	date	table_no	gusts_no	phone_number	last_name	first_name	restaurant_id	id
00:12:00	2023-11-22	3	2	0555555555	aa	Reema	2	1

Restaurant(ID,category_id,name,website_url,location,description,logo,profile_img)

The screenshot shows the phpMyAdmin interface for a database named 'yum'. The 'restaurant' table is selected, and its data is displayed in a table view. The table has columns: id, category_id, name, website_url, location, description, logo, and profile_img. There are 5 records listed.

id	category_id	name	website_url	location	description	logo	profile_img
